## Regional Drought Resilience Plan

## We want to hear from you!

Parkes, Forbes, and Lachlan Shire Councils are working together to develop a Regional Drought Resilience Plan and we want your valuable insights and ideas to help prepare the plan.

The purpose of the plan is to consider the opportunities available to mitigate and alleviate the impacts of drought now, before drought is upon us.

An online survey is open now (QR code below) and a series of local drop-in sessions and workshops will be held across all three Shires between 1-5 July 2024.

RSVP is not necessary, simply come along and contribute! Refreshments will be available.

Can't make it to a session?

Access the online survey using the QR code
